

Electrolytically Concentrated Alkali Cleaning Water

Benefits

1. Alkaline cleaning water electrochemically generated from water using patented technology.
2. A cleaning agent that is gentle on the human skin, materials, and the environment and has a high degree of safety.
3. Passes almost all 50 items of drinking water quality standards except alkaline pH.
4. Electrolysis improves permeability and makes oil stains stand out for easy cleaning.
5. Since no chemicals are used, it can be delivered by courier or airmail.
6. Unlike general detergents (polymeric agents), there is no foaming, greatly saving water for rinsing.
7. There is no chemical load on wastewater treatment equipment after washing.
8. Escherichia coli / Staphylococcus aureus / Viral bacteria, etc. disinfecting and deodorizing effect.
9. Adopted for CIP cleaning of major food factories, cooking equipment cleaning, and commercial use at major supermarkets.

How to Use

This electrolyzed alkali cleaning water can be sprayed or used for soaking. Dilute it to the strength level appropriate to the application before use.

Applications

1	Disinfects at the same time as removing oil stains from home cooking equipment such as ventilation fans and ranges.
2	Air conditioner cleaning. Sterilization, deodorization.
3	metal mask cleaning.
4	Alcohol sensor sterilization.
5	Clean food smoking apparatus stains and tobacco stains.
6	Cooking equipment, exhaust ducts and CIP cleaning in food factories and restaurants.
7	Clean oil from metal machine processed products.
8	Water-soluble cutting fluid putrefaction prevention.
9	Elimination action against Escherichia coli, Staphylococcus aureus, viral bacteria, etc.

[Ingredient]	100% water (no chemicals mixed in)
[Alkalinity/Acidity]	Strong alkaline
[Dilution Rate]	To be diluted from 1 to 100 times depending on application (350 mL size should not be diluted)
[Volume]	Described on the label
[Applications]	Alternative to detergents as a cleaner
[Country of Production]	Japan
[Production System]	CLEVER SYSTEM [®] (Patent No. 5121013)

Model	Volume	Price
MICRO WATER	350 mL	1760yen
IDS-S13pH-10	10 L	13,200yen
IDS-S13pH-20	20 L	20,900yen

Please note that appearance, specifications, and prices are subject to change for improvement purposes without prior notice.
